Garmin BaseCamp

Check the version of the map that is installed

Detail level of maps on your screen on your PC

When your Garmin GPS device is connected, you can see it in the left menu

You can see if there are additional memory cards

RMCH 2018

BaseCamp must be prepared before you can transfer the files

Garmin BaseCamp

1. Tap "My Collection"
2. Right-click and you get menu
3. Create "new List Folder"

Vis på kort

Send til...

Kopier

Opret Garmin-oplevelse

Ny liste

Ny listemappe

Garmin BaseCamp – How to do it

5. Press the "Your new List Folder"

6. Right-click and you get new options

6. Create "New list"

You should make the same number of lists as there are files (new list for new routes)

One can well import multiple files in the same "list"

The routes are preserved, but waypoints are mixed

Now Garmin BaseCamp is ready
Now you only need to receive some files with the routes.

Open your email – Save Attachments

1. Press "File"

2. Select "Save Attachments"

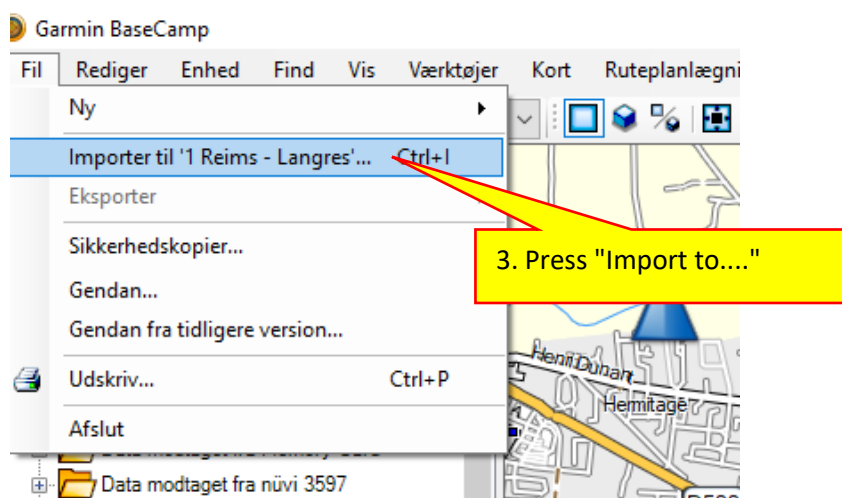

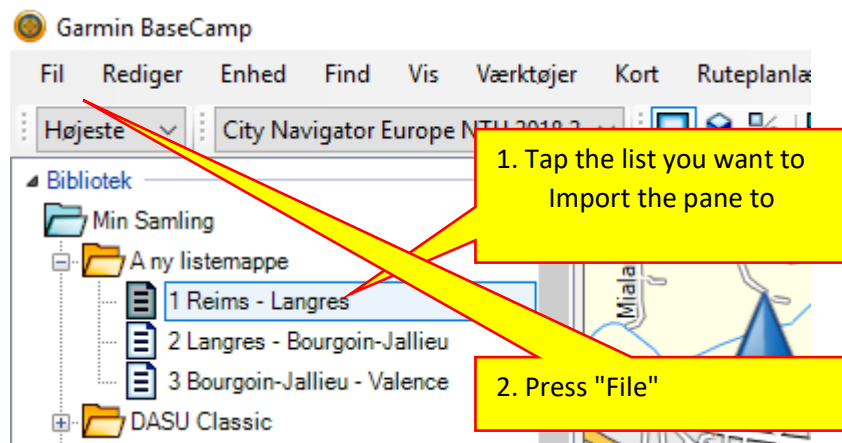

3. Press "OK"

4. Select a folder and save

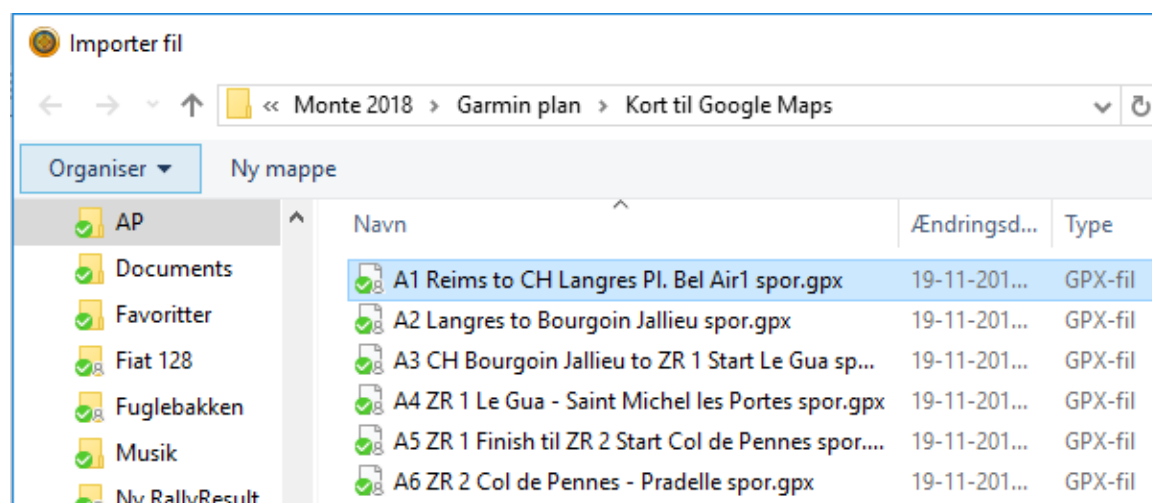

Garmin GPS and BaseCamp – How to do it

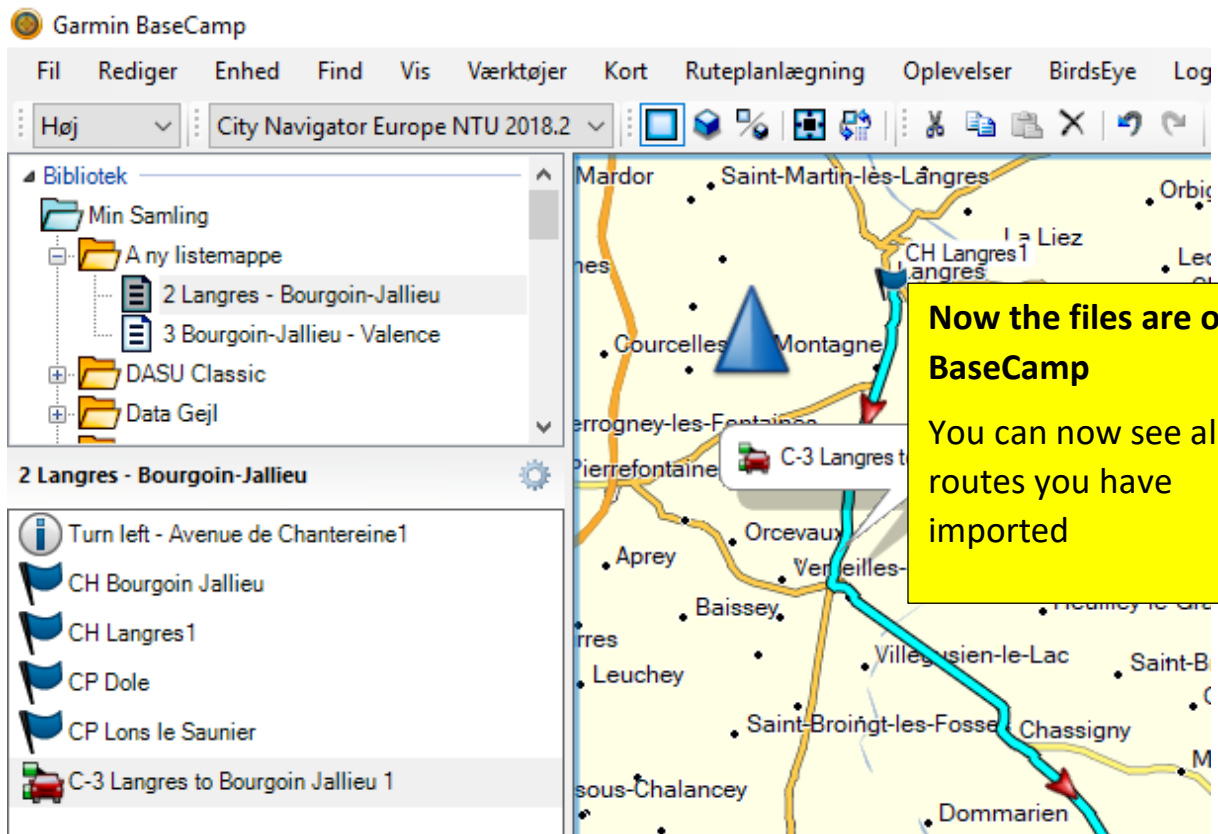

Now you are ready to import GPX files to BaseCamp

File Explorer opens, and you select the folder where you saved the files. Now you select the file you want to insert in BaseCamp (press Open or double-click)

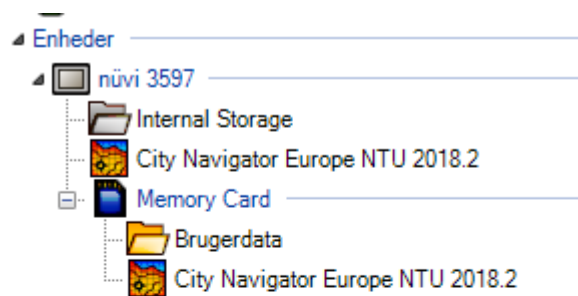

Garmin GPS and BaseCamp – How to do it

Transfer selected routes to the Garmin GPS

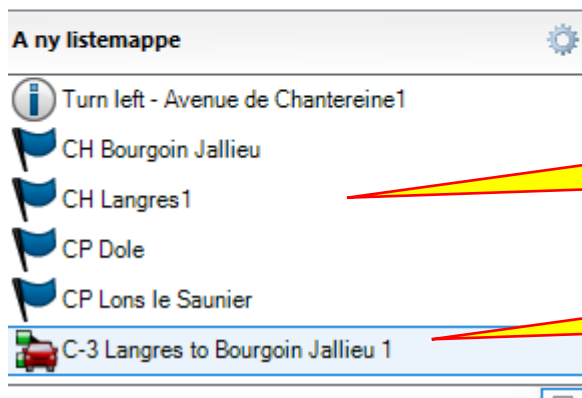

Garmin GPS and BaseCamp – How to do it

1-Garmin GPS Connected

2- Open BaseCamp

In the left menu you can now see that your Garmin is connected

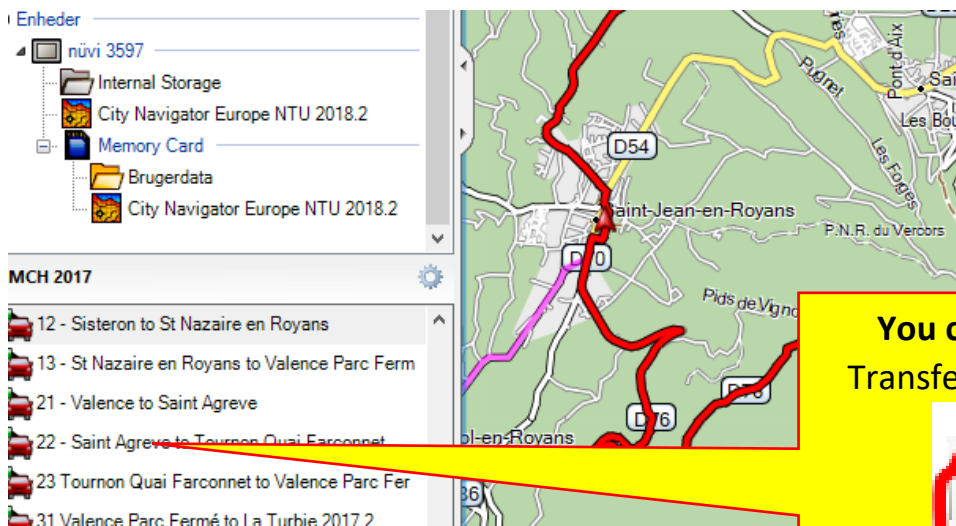

Waypoints

Single spot

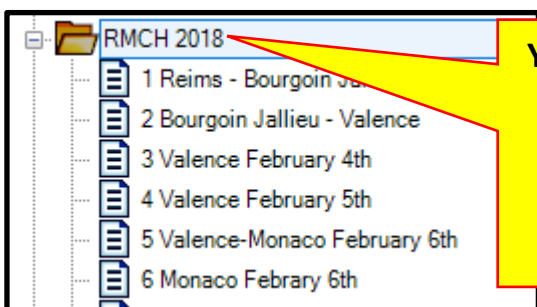

Route

Programmed Route

Select the desired route – or multiple routes – press icon

You can select a route
Transfer to the GPS device

You can select the entire race
Transfer to the GPS device

Disconnect
Garmin GPS
from your
computer when
the transfer is
complete

**Start your Garmin GPS- but have patience when you will see the new routes
Garmin GPS is slow – it is recommended to connect external power and let it rest**
